Bachelor's of Arts in Cognitive
Psychology, June 2012

Experience

June 2020

UX Designer & Researcher
TappedIn

- Using Agile method of 4 sprints, designed the user interface for MenuTap, a web application for restaurant owners to make updates to online menus and send changes to 3rd party delivery platforms.

- Conducted market research to examine restaurant industry trends in the post-covid 19 era.

- Examined internal documentation from competitors and comparative services such as point-of-sale systems to identify requirements in information architecture.

- Created user flows of 3rd party delivery platforms to ensure compatibility for future API integrations.

- Conducted 20+ virtual interviews with subject matter experts, users and user testing sessions.

- Delivered final handoff of UI kit, 5 userflows, mid-fidelity wireframes, annotations and clickable prototype.

September 2019 - February 2020

Lead Code Camp Instructor
Bank Street College of Education

- Taught programming fundamentals to children, ages 7-12, through an online game-building platform.

- Adapted lesson plans based on student feedback to optimize learning for each class.

- Initiatied weekly training sessions with teaching assistant.

February 2018 - August 2019

Freelance Frontend Developer

- Adapted an event-finding application built with React Native for the Beats N' Bars music festival in Durham. Designed and implemented additional interactions so users could easily find artists, locations/schedules of performances.

- Used a combination of HTML5, CSS3, Javascript, Bootstrap and Webflow to create responsive landing pages for small businesses including restaurants, entrepreneurs, and gaming influencers.
